

Large Format Trimmers

472 S Premium Rolling Trimmer

Dahle's 472S Premium Rolling Trimmer offers six feet of superior cutting performance. It features all the benefits you'd expect from our Premium Series, along with a sturdy metal stand and paper catch. This stand is set at the perfect height for trimming, and is ideal for those with limited work space.

The Dahle 472 S is a German Engineered commercial grade tool, with the ability to cleanly cut oversize banners, mat board, and fine art paper with the highest level of accuracy. It features a ground rotary blade, and a self-sharpening cutting system that cuts and sharpens in either direction. This action maintains the blade's precision graduated edge, allowing it to remove even the tiniest sliver of paper, and produce a clean, burr free cut – each and every time.

As with all Dahle products, safety is at the forefront of design. To keep hands in the safe zone, the trimmer's blade is almost entirely enclosed – which virtually eliminates the chance of injury. Holding your work securely is no longer necessary. The integrated, automatic clamping system provides even pressure, and prevents your work from shifting. For measuring, this base contains carefully screened guides, and an adjustable backstop – Which is the easiest way to ensure consistent accuracy during repetitive cutting.

The included metal stand (Dahle 799) offers a stable base for this six foot trimmer. The Dahle 472 S Premium Rolling Trimmer is the preferred choice among professional photographers, sign makers, and print & copy shops.

Features

- Cuts up to 12 sheets of paper at a time
- Machine ground rotary blade is encased in a protective housing for safety
- Easily trims standard size matboard
- Self sharpening blade cuts in both directions
- Automatic paper clamp holds work securely
- Sturdy metal base with preprinted guides
- Includes stand for optimal trimming height
- Imprinted protractor for angled cuts
- German engineered for precision & accuracy

Adjustable guide can be mounted on either side of the trimmer to easily line up repetitive cuts.

Features a ground self-sharpening rotary blade that cuts in either direction.
