

Are you properly destroying your confidential data?

Environmentally safe, efficient and quick. A must-have for anyone charged with the responsibility of destroying unneeded CD, CD-R, and CD-RW discs containing corporate or government sensitive and classified information.

FAST OPERATION —

5 to 10 seconds to completely remove all information from any CD, CD-R, or CD-RW disc.

HIGH LEVEL OF SECURITY —

Designed to substantially exceed all published recommendations and standards for the removal of the data layer on compact disc media. DoD approved for all classified discs.

MEDIA IDENTIFICATION —

The inner hub or clamping area remains untouched to allow positive media identification for those applications where certification of destruction is required.

APPROVED BY THE DEPARTMENT OF DEFENSE
